

Trainee/Junior Java Developer

Anton Fedoruk

Projects

1. A bot app for monitoring charging stations for cars. (Teelram Bot)
[Java, Spring Boot, Maven, MySQL, GitHub, Selenium, Docker ...]
2. A bot app that allow users to interact with their Google Sheet "Board games". (Teelram Bot) [Java, Spring Boot, Maven, MySQL, GitHub, Google API, Docker ...]
3. Sweater (Twitter analog)
[Java, Spring Boot, Maven, MySQL, FreeMarket, Bootstrap, GitHub, ...]

Work Experience

Self Learning

Along the learning process I have tried to create several pet-projects. Two of them are already in use! As framework for project management I have used Maven. To reduce boilerplate code, I use Spring Framework (Core, MVC, Security, Data...) which is responsible for base configuration models of applications. I preferre to use MySQL database service. As version control system I use GitHub. For testing purposes i have JUnit, Mockito, Selenium, Postman and Chrome dev tools, up my sleeve. I also use Docker to configure services and run the apps as it can take full responsibility for this during the deployment phase.

I have already dealt with:

- JSON, XML
- Markdown, YAML
- Bootstrap, Thymeleaf, Koala
- Linux
- OAuth
- Selenium
- Docker
- IntelliJ IDEA
- Visual Studio Code

I am currently keeping my in-depth study.

Logistics tracking associate, Afterhours Support Representative at "Everest Transportation Systems" [2021 - 2023]

At this job, I was a part of the Afterhours Tracking Representative team.

When switching to a new platform (Revenova TMS), I familiarized the team with setting up filters and layouts, and then adjusted them to the needs of our department.

Experience gained

I have learned and already succeeded how to:

- identify and solve issues of difference levels of complexity
- ensure the timely transit of freight
- establish relationships with partner carriers to receive timely updates

Engineer designer of sound and visualization systems at LLC "APT UKRAINE GROUP" [2019 - 2020]

At this job, I was engaged in the development of sketch, design documentation (drawings) of sound and video systems with their use both individually and in smart house systems; selection of equipment and components for such systems.

Experience gained

I have gained knowledge of S&V systems designing according to building standards, preparation of technical documentation, communication with the customers(both from Ukraine and from Cairo). Increased vocabulary of English words in this area.

Education

Master Degree

National Aviation University
September 2018 - February 2020 | Ukraine

Bachelor Degree

National Aviation University
September 2014 - May 2018 | Ukraine

Languages

English

Intermediate

Tech Skills

- Java
- OOP
- DB: MySQL
- Spring: Core/Boot/MVC
Security/DataJPA
- Hibernate/JPA
- Git/GitHub
- JUnit/Mockito
- Design Patterns
- IntelliJ IDEA, Maven
- Docker
- Selenium
- CSS/HTML

Soft Skills

- Creativity
- Teamwork
- Prioritizing
- Critical thinking
- Problem-solving
- Self-organization
- Willingness to learn
- Effective communication

Interests

- Skiing
- Cooking
- Walking
- Board games
